

SUV200

Series of In-Motion Satellite Systems

For Your Sport Utility Vehicle, Mini-Van or Limousine

Receive Over 200 Channels of Digital Satellite Television While In-Motion!

The Top-Of-The-Line In-Motion Satellite System is now available to the Sport Utility, Limousine and Van Market. With the SUV200 you can receive up to 200 channels of digital television programming from Astra, Hotbird, Eutelsat while driving throughout Europe. SUV200 is compatible with all DVB Services, receivers, and satellites.

Features:

- ★ Sleek, aerodynamic design is aesthetically pleasing and secure
- ★ Automatically acquires and tracks the satellite, even while moving and turning on winding roads
- ★ SUV200's require only one coaxial cable connection to the antenna; no drilling necessary to install
- ★ Continuous tracking. Patented rotary joint design eliminates cable wrap
- ★ Universal design is easy to install or remove in minutes without tools
- ★ High speed, low power DC servo-motors ensure the antenna is always locked on to your programming provider
